

# Installation Instructions

Kit, Drum Vane - 134509600

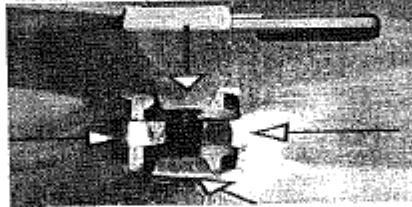

This kit includes the following parts:

- (1) Drum Vane
- (1) Screw, Stainless Steel
- (1) Installation Instruction

The drum vanes are held in place by (6) tabs that are slipped into slots in the spin basket.

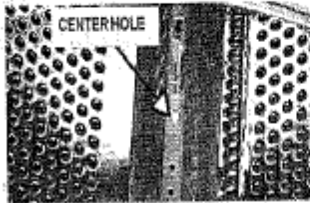

The vane is locked in place by 4 tabs pressed out of the spin hub.

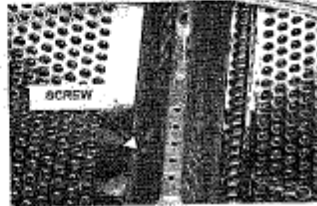

To replace the drum vane:

1. Insert a small flat blade screwdriver (1/8" shaft minimum) into the center hole of the drum vane and push the locking tabs open.

2. Slide the vane toward the door opening to release the (6) tabs and push on the side of the vane to remove.

3. To install the vane, insert the six tabs of the vane into the six slots in the tub and slide the vane toward the rear.
4. Install the stainless steel screw in the hole on the side of the vane.
