

PUMP MOTOR KIT #5303943152

CONTENTS:	Motor	154280501
	Relay	154323501
	Watershield	5300809366

INSTRUCTIONS:

Disassembly

Disassemble the pump-motor assembly noting the relative location of each component part. Refer to the appropriate service manual if necessary. A special pump disassembly tool called a "4 IN 1 TOOL" (#154154801) is available from Frigidaire Parts.

Installing Watershield

Press the furnished 4" round Watershield onto the new motor shaft by applying pressure close to the center. The finned side of the shield should be facing the motor housing with about 1/16" clearance.

Reassembly

Carefully mount the motor to the pump housing and reassemble the pump parts. Reuse the face type water seal in the housing and lower impeller only if the mating surfaces are smooth and polished in appearance.

Relay

Always replace the original relay with the new one supplied with this kit.

Wiring

Plug the replacement motor harness directly into the dishwasher harness.

Note

Retain this instruction sheet with the dishwasher for future part number reference.
